

H-NAT 2021

The new marketplace that the industry's movers deserve

H-NAT 2021 is the first Natural Hydrogen summit (June 2-3, online) and a must-attend event for all energy players to discover and deepen their knowledge about the new energy source that will undoubtedly transform on the energy market.

Natural Hydrogen is the best alternative to hydrocarbures and a growing industry

Today, hydrogen is presented as the best alternative for hydrocarbures in numerous uses, but it's mainly manufactured from hydrocarbures and results in CO₂ emissions. While it can still be manufactured using Electrolysis, it is indeed a more expensive option.

Thankfully, there is another option: Natural Hydrogen that is generated by geological processes. Emanations of hydrogen have been observed in many places, and natural H₂ is now considered **to be a serious source of truly green and inexpensive H₂.**

The industry is starting to grow: From small companies, startups, to the major players, are acquiring explorations permits while services industry is proposing tools to de-risk the exploration phase, which is resulting in the drilling of the first wells. While countries get organized to integrate this new resource and the research field is considered active, investors are betting big on the success of this new and emerging industry.

A unique opportunity for all stakeholders to learn about this new and promising market

H-NAT will gather the emerging and growing ecosystem around natural hydrogen, in order to explore the latest developments, network and partner with the industry's players. For attendees, the event is a unique opportunity to :

- **Improve and update their knowledge on a disruptive energy**
Natural hydrogen is a renewable, regular and decarbonized energy, and research on the topic has been abundant over the past few years. The summit is a unique opportunity to learn about this complex topic from the best experts in the world.
- **Understand the commercial and strategic importance of this new energy source**
Natural H₂ will have a huge impact on the energy market. A whole section of the conference program will be dedicated to understanding the challenges and opportunities around the topic, and a global vision of the potential of the new market.
- **Meet the first and leading players of the market**
The virtual exhibition and networking tools will allow attendees to exchange with the teams and companies who made the most important breakthroughs about natural hydrogen, and access key information about the first projects in the world.

A conference program designed to provide a 360 degree view on the topic

Over 60 top speakers will explore strategic and technical topics under H2, in a variety of formats : keynote speeches, panel discussions, use cases... All conference sessions will be streamed online and will be available on-demand for two months. [Discover the program](#)

Day 1 :

Exploration : Where and how to look for H2

- Generation / Accumulation : State of the industry - What we know and don't know so far
- What is happening around the world: overview of the 5 continents

Day 2 :

Production & Business

- Production / Separation / Use
- Overview of the market players

A panel of speakers among the very best experts in the world on the topic

- Dr Isabelle Moretti, *Senior Researcher*, **French Academy of Technologies**
- Alain Prinzhofer, *Scientific Director*, **GEO4U** and *Associate Professor*, **IPFG**
- Dr Isabelle Le Nir, *Interpretation Engineering Manager*, **Schlumberger**
- Nicolas Pelissier, *President*, **45-8 Energy**
- Dr Michael E. Webber, *Chief Science and Technology Officer*, **Engie**
- Dr Viacheslav Zgnonnik, *CEO*, **Natural Hydrogen LLC**
- [Meet our speakers](#)

Meet and interact with the leaders and newcomers of the natural hydrogen industry

Meet and network with 20 of the most innovative companies in the market. They will showcase the latest products and services in the virtual exhibition. Discover current and upcoming projects, and stream 30 demo sessions, live and on-demand.

About CORP

Organizer of high level exhibitions and conferences mainly in the field of new technologies, CORP designs, produces and manages every year more than ten major events in France, Canada and abroad, including: BIG DATA PARIS, BIG DATA TORONTO, AI PARIS, AI TORONTO, BLOCKCHAIN PARIS, DATAMARKETING, GAZELEC, SMART ENERGIES. CORP proposes niche subjects, innovative and having an impact on their ecosystem.
